Victoria Park
Infant School

Every day, each and every one of us try our best to be... **STARS**

6th May 2026

Dear Parents and Carers of Year 1

It has been brought to my attention that there is a case of Threadworms in aY1 class. Threadworms are white and look like small pieces of thread. You may notice them around your child's bottom or in your or your child's stools.

They don't always cause symptoms, but people often notice itchiness around their bottom. This can be worse at night and can sometimes disturb sleep.

Threadworms are very common in young children, if you notice any of these symptoms in your child, treatments can be bought over the counter at any chemist. The best prevention for infection is hand washing, please continue to remind children to wash their hands regularly.

Kind Regards

Miss Vrlec
